Summary

B.Tech IT graduate with a strong interest in software development and full stack web development. Experienced in building web applications using the **FULL STACK** specialized in **MERN STACK** and **python Django** and aiming to grow as a **Software Developer**.

Certifications

- Python Certification – Kaggle
- AI Machine Learning Certification - IBM

Education

COCHIN UNIVERSITY OF SCIENCE AND TECHNOLOGY, B.Tech in Information Technology — NOV 2022 –APR 2025

STATE BOARD OF TECHNICAL EDUCATION , Diploma in Computer Engineering — NOV 2020 –MAY 2022

Experience

React Developer, Amrita Vishwa Vidyapeetham (Virtual Labs) — Aug 2025– Nov 2025

- Developed interactive 3D blockchain simulations using React and Three.js across topics like blocks, hashing, mining, consensus, transactions, and smart contracts.
- Converted complex blockchain concepts into visual, real-world learning modules with animations, interactive flows, and gamified experiment activities.

Full Stack Developer, NOTIME — Apr 2025– July 2025

- Developed full-stack applications using **React TypeScript** and **Next.js** with AI-powered image-to-JSON conversion integration
- Built project management features in React TypeScript applications, enhancing workflow efficiency and user experience

Technical Skills

- Programming Languages: **JavaScript, TypeScript, Python, Java**
- Frontend Technologies: HTML, CSS, **React.js, Next.js, Tailwind CSS, Redux, Zustand**
- Backend Technologies: **Node.js, Express.js, Django, REST APIs, MVC, Microservices**
- Databases: **MongoDB, MySQL, Firebase, PocketBase**
- Cloud : **AWS (EC2, S3, RDS, t3** micro**)**
- Version Control: **Git, GitHub**

Projects

SMART CROPS | MERN stack, MongoDB, Razorpay, Web3.js, Passport.js, REST API, Postman , Tailwind CSS

- Built a web platform for farmers to **sell products** and get **crop predictions** using soil and climate data, with a **REST API** and **MongoDB** for data handling.
- **Razorpay** for secure payments and **Google Auth** via **Passport.js** for login and role-based access.
- Used **Blockchain (Web3.js + Sepolia)** to track product data and prevent unauthorized admin changes.

E-KART (Clothing E-Commerce Platform) | React.js, **TypeScript**, **Zustand**, **Tailwind CSS**, **Python**, **Django**, **PostgreSQL**, **REST API**

- Developed a clothing e-commerce platform with secure user authentication and product browsing.
- Built a fast and responsive UI using React.js, **TypeScript**, **Zustand**, and **Tailwind CSS**.
- Created **RESTful** APIs in **Django** for managing users, clothing products, carts, and orders.
- Designed PostgreSQL database schemas to efficiently store product, user, and order data.
