PROFILE

Software Engineer with 1.5+ years of experience as a Software Developer, specializing in React, React Native, and Redux. Skilled in building scalable, responsive, and user-friendly web and mobile applications with a strong focus on UI/UX design and performance optimization. Experienced in collaborating with cross-functional teams to deliver efficient and reliable solutions. A proactive learner passionate about modern front-end technologies, seeking opportunities to contribute to innovative projects and grow in a dynamic technology environment.

WORK EXPERIENCE

Oct 2025 - Present

Software Engineer / Frontend Developer

UIT Global Solutions Pvt Lmt

- Developed scalable web and mobile applications using React.js, React Native, and Redux
- Built reusable components and implemented efficient state management for maintainable code.
- Integrated APIs and third-party libraries to enhance functionality and user experience.
- Optimized applications for cross-platform compatibility and high performance.
- Ensured clean, maintainable code following modern development best practices.
- Debugged and resolved technical issues, ensuring stable and smooth application performance.

Mar 2024 - Aug 2025

Software Developer

Oneyes infotech solutions

- Worked on full-stack web applications using React.js for frontend and Node.js/Express.js for backend services.
- Built responsive and interactive user interfaces following modern component-based architecture.
- Implemented JWT-based authentication and authorization, ensuring secure user login and role-based access control.
- Built reusable React components and custom hooks to improve code maintainability and scalability.
- Developed pixel-perfect designs by translating Figma wireframes into interactive web pages.
- Improved performance with techniques like lazy loading, code splitting, and image optimization
- Developed and consumed RESTful APIs for seamless client-server communication.
- Designed, queried, and managed databases using MySQL, ensuring efficient data storage and retrieval
- Deployed and managed applications on Google Cloud Platform (GCP) for scalable, cloud-based solutions.
- Followed Agile methodologies, actively participating in daily stand-ups, sprint planning, and code reviews.
- Collaborated with cross-functional teams and QA engineers to debug, test, and optimize applications for performance.
- Used Git/GitHub for version control, maintaining clean, reliable, and collaborative codebases.

CERTIFICATES

Meta Front-End Developer
https://coursera.org/share/24cbee85c71c9ba974d3eba6b49d0ed7
Core Java
https://coursera.org/share/5bb57525275fba4f05b1f49bd9cdc5a1
Spring Framework
https://coursera.org/share/fe75e21c69ae701ad626e2a436ee24d7
Meta React
https://coursera.org/share/2eb54c0e52b805994485776ce99a92f3
CRUD Operations using MongoDB NoSQL
https://coursera.org/share/75d753b5cf2a9ead0a1133824b7789ec
Git for Developers Using GitHub
https://coursera.org/share/d1c8014216ff7eefc5d667590b9353e0

EDUCATION

B.Sc. Information Technology
CMS College of Science & Commerce
2018 - 2021

CGPA - 7.4

HSC
Maharishi Easwarya Gurukulam Matric Higher Secondary School - Arts Computer
2016 - 2018

Mark Percentage - 64.5%

SSLC
Maharishi Easwarya Gurukulam Matric Higher Secondary School
Mar 2016

Mark Percentage - 60%

SKILLS

TECHNICAL KNOWLEDGE

Languages & Markup
- HTML5, CSS3, JavaScript (ES6+)

Frontend Frameworks & Libraries
- React.js, Redux
- React Native
- Material UI (MUI)

Backend Technologies
- Node.js, Express.js
- RESTful API Development

Databases
- MySQL, MongoDB

Version Control & Collaboration
- Git, GitHub

UI & Responsive Design
- Responsive Web Design (Mobile-first approach)
- Flexbox, CSS Grid
- Cross-browser compatibility

Development Tools
- Visual Studio Code, NPM
- Postman, Chrome DevTools

Methodologies & Practices
- Agile Methodologies (Scrum, Kanban)
- SDLC best practices

FUNCTIONAL KNOWLEDGE

- Frontend application development using scalable, modular, and reusable components
- State management and predictable application data flow using Redux
- Integration of RESTful APIs with efficient asynchronous data handling
- UI/UX-driven development, aligned with enterprise design systems and usability standards
- Strong understanding of component lifecycle, hooks, and rendering optimization
- Experience with form handling, validation, and user input management
- Implementation of role-based access and conditional UI rendering
- Cross-team collaboration within Agile/Scrum environments, including sprint planning and reviews
- Debugging, performance tuning, and code optimization for scalable applications
- Familiarity with error handling, logging, and edge-case management
- Adherence to coding standards, security best practices, and quality guidelines
- Experience with version control, code reviews, and CI-friendly development workflows

PRACTICE

- Component-driven architecture
- Clean code and maintainable UI development
- Continuous learning and adaptation to enterprise frameworks

PROJECTS

Healthcare Application

Healthcare project MedxBay is a feature-rich medical project for doctors,hospitals and medical suppliers, and that enhancing user experience and responsiveness.This is a live project where I worked on backend development for a platform connecting healthcare providers and users. Key features include automated meeting creation, provider profiles, subscription and booking flows, and a condition library. Additionally, a chatbot was developed to answer user questions about the platform's services and features

- Built with the MERN stack (MongoDB, Express, React, Node.js), ensuring a responsive and scalable application.
- Deployed Backend hosted on GCP and the frontend is high performance and reliability.

US-Based React Native Mobile Application

Technology Stack: React Native, Redux, Docker, NestJS, PostgreSQL

- Built a video-centric crowdfunding platform across Web, Android, and iOS to support charity fundraising in the United States.
- Implemented Instagram-style short video feeds with secure, integrated donation and payment options.
- Enabled end-to-end donation workflows, including campaign management, user engagement, and admin moderation**.**

Online Learning Platform (Frontend Development)

Technology Stack: React.js, Docker, NestJS, PostgreSQL

- Designed, developed, and maintained the frontend architecture of CodeUpskill, a scalable web-based learning platform
- Engineered responsive, high-performance user interfaces using React.js, ensuring consistent behavior across modern browsers and devices
- Seamlessly integrated frontend components with NestJS backend services and PostgreSQL for secure and efficient data exchange
- Utilized Docker-based containerization to standardize development environments and streamline collaboration across teams
- Implemented secure authentication workflows and role-based access control, enhancing platform security and user experience
- Improved application performance, code maintainability, and scalability by applying industry-standard best practices and clean code principles
