## SUMMARY

Motivated and detail-oriented recent graduate with a strong foundation in computer science and hands-on experience in designing, developing, and testing software applications. Proficient in programming language in Python and familiar with web development frameworks including HTML, CSS, and React. Skilled in leveraging Microsoft Excel for data analysis, reporting, and automation, and experienced in using Power BI to create interactive dashboards and visualize complex datasets. Possesses strong analytical skills with the ability to interpret data, uncover insights, and support data-driven decision-making. Eager to contribute technical expertise, problem-solving abilities, and a passion for innovation to a dynamic development team. Committed to continuous learning and growth in the evolving landscape of the IT industry.

## EXPERIENCE

### INTERNS

**Mountwarwe technologies** June 2023 - July 2023, Coimbatore

Collaborated on a team project to develop a prototype using Python, enhancing understanding of real-world application requirements and collaborative coding practices.
Assisted in the development of a dataset analysis tool, leveraging Python scripts to automate data processing tasks, which improved efficiency and accuracy in market research compilations.
Participated in debugging sessions and contributed to optimizing code performance for several ongoing projects, leading to improvements in application functionality and speed at Mountware Technologies.

**Techolas Technologies** July 2025 – Present, Kochi

Contributed to full-stack development of web applications using Python, Django, Django REST Framework, HTML, CSS, JavaScript, Bootstrap.
Built reusable back-end functions, implemented authentication, and developed REST API endpoints.
Created interactive and mobile-friendly UI pages and integrated them with backend services.
Managed database models, migrations, and CRUD operations using MySQL/SQLite.
Assisted in debugging, testing, and improving application performance.
Collaborated in Agile sprints, used GitHub for version control, and documented project features.

## PROJECT

"DEEP LEARNING FOR COMPREHENSIVE VIDEO FEATURE EXTRACTION AND ANALYSIS"
( December 2024 - March 2025 )

Built a video analysis system that extracts frames from videos and processes them to detect objects, actions, and context. Used machine learning models and natural language processing techniques to interpret visual and textual information. Designed four modules: dataset generation, video statistics extraction, functional testing, and classification/prediction. The system provides structured insights and summaries from video content. Developed a system that extracts frames from video and analyzes them using image processing and machine learning. The project uses AI models to identify objects, actions, and relationships in video frames and generate meaningful insights. It includes modules for creating datasets, extracting video statistics, testing functions, and performing classification and prediction.

## EDUCATION

Bachelor of computer applications
Bharathiar university • Coimbatore • 2025

## CERTIFICATIONS

IBM Cloud fundamentals
IBM India PVT LTD. • 01/ 2025

Diploma in Cyber Security
Central Board of NCVRT • 02/2025

## SKILLS

Behaviour Skills : Effective Communication , Problem solving, Leadership , Research , Teamwork , Team management
Technical Skills : Python, HTML/CSS, Web Designing, Power BI, Excel, Tableau, MS office

**Language** : Malayalam , English , Tamil , Hindi
