OBJECTIVE

Motivated Computer Science undergraduate with strong knowledge of programming, data structures, algorithms, and database systems. Experienced in developing web and AI-driven applications, with a passion for building efficient and scalable software solutions. Seeking a Software Engineer role to apply technical expertise and contribute to innovative product development.

EDUCATION

College of Engineering Vadakara 2021-2025
Bachelor of Technology in Computer Science
APJ Abdul Kalam Kerala Technological University

SKILLS

Programming Languages	C, Python, Java
Computer Science Fundamentals	Data Structures and Algorithms, DBMS, Object Oriented Programming, Operating Systems
Web Development	HTML, CSS
Tools & Technologies	VSCode, Figma, PyCharm, Git
Database	MySQL
Soft Skills	Creative Problem Solving, Adaptability, Strong Communication and Interpersonal Skills

EXPERIENCE

Technical Executive-Intern. Nov 2025 - Dec 2025
Tertius Life Sciences *Tirur,Kerala*

- Integrated Zoho applications with Google Sheets to automate data transfer and streamline billing and packaging workflows..
- Designed and developed functional modules for the company's billing and packaging software.

PROJECTS

EFFICODE – ML-Based Code Optimization Tool (Link)

- Developed an AI-powered tool to optimize complex Python code using data structures and algorithms.
- Implemented rule-based pattern detection, Random Forest for complexity analysis, CodeBERT for restructuring, and T5 for explanations.

COLLEGE BLOGGING WEBSITE

- Developed a web platform enabling students to post about college events, facilitating information sharing among peers.
- Designed a user-friendly interface with real-time updates using React and Node.js.
- Implemented a dynamic commenting system, allowing interactive discussions on event posts.
