Professional Summary

Innovative AI Engineer skilled in developing GenAI and NLP solutions using Python, LangChain, and OpenAI APIs, with a focus on building real-world, intelligent applications that solve business challenges.

EXPERIENCE

Mind IT Systems – Associate Software Developer (Mar 2024 - Present)

- Interne Chatbot (LangGraph, OpenAI, LangChain, Streamlit): Built an internal AI chatbot to handle employee leave, attendance, and profile queries. Used LangGraph and LangChain for LLM orchestration and added secure login with smooth, dynamic conversation handling.
- AutoMega – AI Code Review Tool (Python, LangChain, LLMs): Created an in-house GenAI tool that reviews pull requests, highlights code issues, and suggests improvements automatically.
- WorkEazy SaaS Platform (Node.js, React.js, MySQL): Improved SMB workflow management with role-based access and real-time dashboards.
- Sujata Workflow Management System (React, Node.js, MySQL): Developed custom workflows to manage inventory, orders, and approvals, improving operations for a manufacturing client.
- Property Management System (Strapi, MySQL): Built APIs for advanced property search and filtering to enhance data accuracy and performance.

Salesforce - Virtual Developer Intern (Apr 2023 - May 2023)

- Developed CRM pages and managed user flow.
- Earned 8 Super Badges in Salesforce Trailhead.

Cert-In - Cyber Security Intern (Mar 2022 - Jul 2022)

- Gained expertise in cyber security fundamentals and prevention strategies.
- Implemented security measures.

EDUCATIONAL DETAILS

Delhi Skills And Entrepreneurship University
MCA - Masters in Computer Application (2022 - 2024) | CGPA: 9.4

Institute Of Innovation In Technology And Management
BCA - Bachelors in Computer Application (2019 - 2022) | CGPA: 9.4

PROJECTS

- PDF Summarizer App (Python, NLP): Built a PDF summarization tool using Hugging Face models (BART, FLAN-T5), PyMuPDF, and Streamlit to extract clean summaries and key insights from text-based PDFs.
- Object Detection App (YOLOv8, Python): Fine-tuned YOLOv8 for a custom object detection task. Trained on labeled datasets and deployed with Streamlit for real-time inference and multi-class detection.
- Musicfy Website (MERN Stack): Developed a full-stack e-commerce website for digital music products using MongoDB, Express.js, React.js, and Node.js.
- Market Basket Analysis (Python, ML): Implemented the Apriori algorithm to identify customer buying patterns and product associations from transactional data.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Frameworks & Tools:** Node.js, React.js, Django, Strapi, MERN Stack, Streamlit, LangChain, LangGraph, OpenAI API, Git, Linux, HTML, CSS, Bootstrap
- **AI / ML & GenAI Tools:** Hugging Face, Transformers, Large Language Models (LLMs), RAG,Prompt Engineering, Vector Databases, OpenAI GPT-3.5/4, Prompt Templates, Agentic AI, Chain-of-Thought Workflows
- **Cloud & DevOps:** Microsoft Azure, RESTful APIs, Postman

Certifications

SAP S/4HANA Cloud – Certified Application Associate (Finance) | SAP SE | May 2024
Microsoft Certified: Azure AI Fundamentals | Microsoft |May 2025
