NAVEENA C

960-098-4174 nnaveena219@gmail.com linkedin.com/in/naveena-c github.com/Naveena

OBJECTIVE

To leverage my expertise in data science, machine learning, and web development to create innovative Solutions, drive insightful data analysis, and contribute effectively to real-world applications.

EDUCATION

Bishop Heber College **Jun 2023 – Apr 2025**
Master of Science in Data Science, CGPA : 8.0 *Trichy, TamilNadu*

Bishop Heber College **Jul 2020 – Apr 2023**
Bachelor of Science in Computer Science, CGPA : 8.4 *Trichy, TamilNadu*

SKILLS

Programming Skills: Python, SQL, Machine Learning, HTML/CSS
Analytical Skills: Power Bi, Excel
Soft Skills: Adaptability, Collaboration, Team Management, Time Management

TECHNICAL EXPERIENCES

NLC India Limited

Predictive Analysis of Solar Generation Data with ML *Neyveli, TamilNadu*

- This project entails analyzing solar datasets by improving key python packages and loading CSV data into pandas dataframes.
- It involves data cleaning, including handling missing values and converting data columns to datetime objects.
- The datasets are merged on their common date column and prepared for regression analysis by selecting relevant features and the target variable.

LiveWire

Python Programming *Trichy, TamilNadu*

- Gained hands-on experience with basic programming concepts and tools during internship training.
- Worked on small-scale projects to understand real-world application of Python and web development.

PROJECTS

Power BI Dashboard - Insurance Risk and Claims Analysis **August 2025**
[link]

* Created an **interactive insurance dashboard** to analyze customer policies and claim behavior for data-driven decision-making.
* Tracked **key KPIs** such as Total Policies, Claim Amount, and Claim Frequency across multiple customer segments.
* Provided insights by **car type, age group, and coverage zone** to support business analysis.

Power BI Dashboard - Sales Performance **August 2025**
[link]

* Developed an **interactive sales performance dashboard** to analyze trends across years, quarters, and months.
* Identified **top-performing sales teams and individuals** to support performance evaluation.
* Analyzed **revenue contribution by category, geography, and customer growth patterns**.

Navigating the World with an AI-Driven Environment for the Visually Impaired **April 2025**

* Navigate their surroundings, recognize faces, and identify currently through real-time voice feedback.
* It integrates YOLO for object detection, Grassmann for face recognition, and CNN for currency classification.
* Enabled real-time object, face, and currency recognition to enhance independent navigation and situational awareness for the visually impaired.

Analyzing Student Performance **April 2023**

* Cleaned and analyzed student marks data, handling missing values and irrelevant entries.
* Calculated key statistics, visualized trends with a bar graph, and provided insights to improve performance.
* Found patterns in student scores to help teachers understand learning gaps.

CERTIFICATIONS

Artificial Intelligence and Machine Learning :Besant Technologies **certificate**
Azure Fundamentals: Microsoft **certificate**
Advanced Google Analytics: Advanced Google Academy **certificate**
Introduction to Python Programming: Coursera **certificate**
Introduction to Machine Learning: Infosys **certificate**
