LinkedIn

TECHNICAL SKILLS

Programming Language: Java, JavaScript
Backend Technology: Spring Boot, Spring MVC, Microservices Architecture, Hibernate, RESTful APIs
Frontend Technology: Angular, HTML, CSS
Databases: MySQL, MongoDB
Security: JWT Authentication, Role-Based Access Control (RBAC)
Tools : Git, Postman, VS Code, Eclipse, Spring Tool Suite (STS)

EDUCATION

Sinhgad Institute of Management, Pune
Master of Computer Applications (MCA)
2023–2025 | CGPA: 7.23

Commerce, Management & Computer Science (C. M. C. S.) College, Nashik
Bachelor of Science (Computer Science)
2019–2022 | CGPA: 6.83

SOFT SKILLS

- Innovation
- Evaluation
- Team Collaboration
- Facilitation

ACHIEVEMENTS

Research Publication

Convergence of IoT and 5G: Impacts, Challenges, and Future Directions

IoT and 5G Research, NIT Mizoram (2024)

PROFESSIONAL SUMMARY

Java Full-Stack Developer with 1.5 years of experience and a Master of Computer Applications (MCA). Expert in building scalable microservices using Spring Boot, RESTful APIs, and secured JWT authentication. Proven track record of optimizing backend performance by 25% and database query speed by 40%

WORK EXPERIENCE

Software Developer | *Intellisys IT Solution* Nov 2024 – Jan 2026

- Developed backend microservices using Java and Spring Boot, improving system scalability and performance by 25%.
- Designed and implemented RESTful APIs integrated with MySQL and MongoDB databases.
- Implemented JWT-based authentication and role-based authorization to secure application access.
- Collaborated in Agile development cycles, reducing integration issues by 30%.

Software Developer Intern | Soft Crowd Technologies
Jan 2023 – Jul 2023

- Improved backend efficiency and reduced response time by 25 percent.
- Optimized MySQL performance, resulting in 40 percent faster query execution.
- Implemented JWT-based authentication using Spring Security.

PROJECTS

Intellisys HRMS *Java, Spring Boot, MySQL, JWT*

- Built Spring Boot backend for employee management, improving process efficiency by 30%.
- Implemented JWT-based role access for Admin/Employees, reducing security issues by 40%.

LocalChat *Java, Spring Boot, Firebase, Geolocation API*

- Developed real-time messaging APIs, improving delivery speed by 35%.
- Added geolocation-based messaging within a 2km radius, increasing user interaction by 30%.

Forex Trading Platform *Java, Spring Boot, REST APIs, MySQL*

- Developed REST APIs for trader analytics and rankings using Spring Boot.
- Optimized database queries to improve overall system response time by 25%.
