Mukund Kumar

9334048316 — mukundkumar5378@gmail.com — linkedin.com/in/mukund-kr01/ — github.com/mukund112

Summary — Computer Science Engineering student with a strong foundation in software development, data structures, and full-stack web technologies. Experienced in building real-world projects using Django, Machine Learning, HTML, CSS, and JavaScript. Proficient in C++, Java, and Python with hands-on experience in SQL, Git, and cloud technologies. Passionate about problem-solving, backend development, and building scalable applications with a continuous learning mindset.

Education

Bachelor of Engineering (B.E) in Computer Science & Engineering — **2021 – 2025**
Chandigarh University, Mohali — **CGPA: 7.8**
Intermediate (Class XII – CBSE) — **2018 – 2020**
CPP Collage, Hisar bourhar — **Percentage: 72%**
Matriculation (Class X – CBSE) — **2017 – 2018**
Indian Public School Madhubani — **Percentage: 68%**

Training & Projects

E-Commerce Platform (Django) — Chandigarh University – Full Stack Developer – GitHub **Feb 2025 – May 2025**
- Developed a scalable full-stack e-commerce platform using Django, MySQL, HTML, CSS, and JavaScript.
- Implemented authentication, product management, cart, order handling, and secure CRUD operations.
- Optimized backend APIs and SQL queries to improve application performance and response time.
- Applied Object-Oriented Programming (OOPs) principles and debugging techniques for maintainable code.
- Integrated responsive UI components and improved overall user experience across devices.

Real-Time Web Search Engine — Chandigarh University – Frontend Developer – GitHub **Apr 2024 – Jun 2024**
- Built a responsive real-time web search interface using HTML, CSS, JavaScript, and API integration.
- Improved search result rendering and reduced page load time through frontend optimization techniques.
- Collaborated in feature enhancement, debugging, and improving usability for better user interaction.
- Implemented dynamic UI updates and efficient data handling for faster search experience.

Gender and Age Detection using Machine Learning – GitHub **Nov 2023 – Mar 2024**
- Developed a CNN-based deep learning application for real-time gender and age prediction.
- Used OpenCV for face detection and TensorFlow/Keras for model training and inference.
- Processed live webcam input with optimized prediction accuracy and low latency.
- Applied Machine Learning, Computer Vision, and debugging techniques to improve model performance.

Technical Skills

- **Programming Languages & Databases:** Python, C++, Java, C#, MySQL, SQL, PL/SQL
- **Frameworks & Web Technologies:** Django, .NET Framework, ASP.NET, HTML, CSS, JavaScript, React (Basic)
- **Concepts & Methodologies:** Data Structures & Algorithms, OOPs, SDLC, REST APIs, Agile Methodology, AI/ML, Generative AI
- **Tools, Platforms & Cloud:** Git, GitHub, Docker, Jenkins, AWS (Basic), Linux, Postman, VS Code
- **Strong Skills:** Problem Solving, Debugging, Backend Development, Database Query Optimization, API Integration

Languages Known

- English, Hindi

Academic Achievements

- Solved 400+ coding problems across various platforms. (Link)
- Completed certified courses in CS, AWS, and ML.
- Cleared NPTEL exams in C++, Discrete Mathematics, and IoT.
- Gold Medal in the Internet of Things (IoT) course offered by NPTEL .

Certifications & Awards

- Developing AI Applications – Coursera View Certificate
- Getting Started with Data Analytics on AWS – View Certificate
- SQL (Basic & Intermediate) – View Certificate
- Programming Foundations with JavaScript, HTML and CSS – View Certificate
