SHAMIL

Full Stack Developer

Phone: 8156971351 **Whatsapp:** 8156971351 **Email:** shamilsham248@gmail.com

OBJECTIVE :

Entry-level software engineer experienced in developing and maintaining full-stack applications, with exposure to DevOps workflows and IT support operations. Interested in creating intelligent, scalable solutions, improving application performance, and working within collaborative, technology-driven teams.

SKILLS & LANGUAGES :

- Project Management & Organization
- Fast Learner with Advanced Technical Adaptability
- Collaborative Teamwork
- Problem-Solving & Critical Thinking
- Attention to Detail & Precision

English
Advanced

Hindi
Intermediate

Malayalam
Native

EDUCATION :

B. Tech in Computer Science
MES College of Engineering, Kuttippuram
APJ Abdul Kalam Technological University
2020-2024

Higher Secondary Education
MESHSS Ponnani, Malappuram
Directorate of Higher Secondary Education
2018-2020

TECHNICAL SKILLS :

- Programming Languages: Python,C
- Web Development: HTML, CSS, JavaScript, React JS,NextJs,Nodejs
- Database Management: MySQL
- Framework & Libraries : Django, Bootstrap, Flutter
- Tools : Git, GitHub, VS Code, Wampserver, JIRA

EXPERIENCE :

Junior Full-Stack Developer
TrickyDot Technologies Pvt. Ltd June 2024 - August 2025

- Collaborated on frontend and backend development to build, optimize, and maintain web applications.
- Developed and styled user interfaces with HTML, CSS, JavaScript, and frameworks like Bootstrap and PrimeReact for responsive, user-friendly designs.
- Engaged in backend development using Django, building REST APIs and managing database integrations to enhance functionality.
- Actively participated in code reviews, troubleshooting, and debugging processes.
- Gained hands-on experience with version control through Git and GitHub.
- Contributed to team discussions and implemented feedback to refine coding practices.
- Focused on improving application performance through continuous optimization.

PROJECTS :

FACE-RECOGNITION

Developed a Face Recognition Attendance System using React.js, Django, and Tailwind CSS. The application captures and processes real-time facial data to automate attendance marking, reducing manual effort and enhancing accuracy. It features a clean, responsive UI and ensures a secure, efficient, and user-friendly experience for both admins and users.

• **Front-End: HTML, CSS, BOOTSTRAP,REACT JS** • **Back-End: Python** • **Framework: django** • **Database : MYSQL**

Github Link : https://github.com/shamilsham07/face-recognition

ERP-SOFTWARE

Developed an ERP software solution using Python (Django) for the backend and React.js with Tailwind CSS for the frontend. Key features include Excel import/export, automated PF and wage calculations, and an interactive dashboard with Chart.js for real-time visualization. Custom pagination was implemented to optimize performance with large datasets, showcasing strong full-stack development skills.

• **Front-End: HTML, CSS, BOOTSTRAP,REACT JS** • **Back-End: Python** • **Framework: django** • **Database : MYSQL**

INFO-HUB

Developed info hub, a dynamic Full-Stack web Application using ReactJs,Django and SQL. designed to provide a seamless platform for AI tools, domain management, and CV review. The backend, powered by Django , manages UserAuthentication,Rolebased Access control and Premium Feature Access,with REST APIs enabling smooth communication between the frontend and backend. React.js delivers a responsive and engaging user interfaces,optimized for both desktop and mobile devices, featuring intuitive navigation, Gemini AI integration, a Domain Checker, and a CV Review tool. The SQL database securely handles ,userdata,premieum subscriptions, and platform content, ensuring reliable performance, quick data retrieval, and a smooth user experience.

• **Front-End: React JS** • **Back-End: Python Django** •**Database: MySQL** •**API: Gemini,Stripe,Domaincheck,cv review**

Github Link : https://github.com/shamilsham07/INFO-HUB

Eccomerce

This eCommerce project is a full-stack web application that allows users to browse products, register and log in, manage a shopping cart, and place orders. The backend handles APIs, user authentication, database operations, and email notifications, including sending password recovery emails via SMTP. The frontend provides a dynamic and responsive interface, ensuring a smooth and intuitive user experience across devices. The platform incorporates state management, visual charts for sales and analytics, secure payment processing, and a review system. Overall, it delivers a seamless online shopping experience with efficient performance, easy navigation, and robust backend functionality.

• **Front-End: React JS** • **Back-End: Python Django** •**Database: MySQL**

GEO TUBE

GeoTube is a web application for predicting the best crops to grow based on soil contents. It features a frontend built with HTML, CSS, and Bootstrap, and a backend powered by Python and Django. The crop prediction is driven by a decision tree algorithm implemented with scikit-learn. Users can input soil data to receive accurate crop recommendations.

• **Front-End: HTML,CSS,BootStrap** • **Back-End: Python Django** •**Database: MySQL**
