CAREER OBJECTIVE

Highly organized and detail-oriented professional seeking an entry-level position to launch my career in a prestigious environment. I am eager to contribute my strong work ethic and learn from industry leaders.

WORK HISTORY

Apprentice – Java Development Team
Keltron, Trivandrum | 2025 – Present

EDUCATION

- Python Full Stack Development

  IPCS Global , Trivandrum (2023-2024)

- BTech in Computer Science and Engineering

  APJ Abdul Kalam Technological University (2019-2023)

  Lourdes Matha College of Science and Technology, Kuttichal, Trivandrum

  GPA -6.84
- Class 12th

  Kerala Higher Secondary Education (2018-2019)
  Govt HSS Kamaleswaram ,Trivandrum
  Percentage - 80%
- Class 10th

  Kerala State Board (2016-2017)
  Karthika Thirunnal Govt V&HSS for girls manacaud, Trivandrum
  Percentage - 96%

LANGUAGES

English, Hindi, Tamil, Malayalam

TECHNICAL SKILLS

Language- python, Java, JavaScript (Software debugging, Code Optimization, Error Handling)
Frameworks- Django, Spring Boot (STS), React.js, Thymeleaf, Bootstrap
Tools - JWT, Jasper Studio
Database - MySQL, postgreSQL

SOFT SKILLS

Time Management, Problem solving, Collaboration, Teamwork, Quick learner,Troubleshooting, Mentorship

PROJECTS

Final Year Project

Skin Disease Detection System Using Deep Learning

- Project done with the help of Django Framework in Python Language

  We use a ResNet50-based deep learning model with transfer learning to automatically detect nine skin diseases. Data augmentation improves performance, and the trained network accurately identifies diseases from input images without manual feature extraction.

Pre-Final Year Project

Motion Detection In CCTV Cameras

- Project done with Python language

  Integrating facial recognition with CCTV systems enables human-animal differentiation, minimizing unnecessary recordings, saving storage space, and enhancing security by triggering alarms and alerts when a person is detected.

Other Projects

Social Media Website using Django

- Project doing with the help of Django Framework, JavaScript, HTML, CSS , Bootstrap in Python

  This Django project offers a dynamic social platform where users can connect, share, and interact. It includes features like authentication, profiles, news feeds, comments, and likes. Django's scalability and security ensure growth and data protection, while its flexibility allows for a customized social media experience.

Dhanwanthari Lab and Stationary Billing System (Java Microservices)

Developed a web-based application to manage laboratory operations and stationary billing. Built with Java (Spring) backend and React frontend, using PostgreSQL for data storage. Implemented microservices for scalable services and integrated iText to generate lab reports and invoices.

Law Digitization and Document Storing System

Developed a web-based application to digitize, store, and manage official legal documents for the Secretariat. Built with Spring Boot (Java) backend and Thymeleaf frontend as a monolithic application, providing centralized, efficient, and easily deployable document management.

ACHIEVEMENTS

- Certificate for completion of Python3.4.3 Training successfully completed, organized at Network Systemz, Vanross Jn, Trivandrum
- Participated in 3 day Residential Camp in Machine Learning Through Python , conducted by ICFOSS ,Karyavattom, Trivandrum
