INTERNSHIP EXPERIENCE

Cyber Square – Python Fullstack Developer

Developed dynamic and responsive user interfaces using React and Bootstrap.Built and integrated RESTful APIs using Django and Django REST Framework.Worked on full-stack development using React for frontend and Django for backend.Used Git and GitHub for version control, branching, and collaborative development.

PROJECTS

- **Cutiee App –** *HTML, CSS, JavaScript, Python, Android Studio, MySQL* **–**

  children a re increasingly drawn to smartphones, often leading to addictiondue to engaging screen elements and constant notifications. This results in neglect of social interactions and academic responsibilities. The Cutiee App addresses these issues by providing a controlled, supervised smartphone environment. The app empowers parents to effectively manage their children's phone use through features .

- **Expense-Management-System –** | *HTML, CSS, Booststrap ,Python, PostgresSQL* **–**

  Developed a responsive expense management system using HTML, CSS, and Bootstrap. The application allows users to add, view, and manage daily expenses with a structured and user-friendly interface. Implemented form validation and responsive design for better usability.

- **Coffee-Shop-Website –** *HTML, CSS , Booststrap* **–**

  developed a coffee shop website using HTML and CSS. It includes multiple sections like Home, About Us, Gallery, Services, and Contact page with Google Maps integration. I focused on responsive design and clean UI layout.
