SAYALI HATWAR

QA Engineer Manual | Automation | ETL s Big Data Testing | GenAI

Email: qasayali12@gmail.com

Contact: +91 9356553789

PROFESSIONAL SUMMARY

Results-driven QA Engineer with **4.4+ years of experience** in **Manual, Automation, API, ETL, Big Data, and GenAI-assisted Testing** across **Banking, BFSI, FinTech, Healthcare, Telecom, Insurance, E-Commerce, Investment Management, Education, Travel, and Pharma** domains. Strong expertise in **ETL validation using Informatica**, **SQL-based data testing**, **Automation**, and **modern test frameworks** with proven success in Agile environments.

TECHNICAL SKILLS

Programming s Scripting

- **Python**
- **Java**
- **JavaScript/TypeScript**

Automation Testing

- Selenium WebDriver
- Playwright (JavaScript/ TypeScript)
- Appium (Mobile Automation – Android iOS)
- TestNG, BDD Cucumber
- Page Object Model (POM), Hybrid Framework

ETL s Big Data Testing

- **ETL Testing (Source to Target Validation)**
- **Informatican PowerCenter**
- Data Mapping C Transformation Validation
- Data Reconciliation Data Quality Checks
- Incremental Full Load Testing
- Data Warehouse Testing
- Flat Files, CSV, XML validation

Big Data Technologies (Testing Exposure)

- Hadoop (HDFS – basic validation)
- Hive (Data Validation using Hive Queries)
- Data Lake Testing concepts

GenAI s AI-Assisted Testing

- Generative AI for:
    - Test Case Generation
    - Test Data Creation
    - Defect Analysis Root Cause Suggestions
    - Automation Script Optimization
- AI-assisted API Data Testing

API s Performance Testing

- Postman
- REST Assured
- API Automation using Java/TypeScript
- Basic Performance Testing (JMeter concepts)

DevOps s CI/CD

- GitHub
- Maven
- Azure DevOps / TFS
- CI/CD Pipeline basics (Build Test Integration)

Test s Defect Management

- JIRA

Database Testing

- **SQL (Oracle, MySQL)**
- Data validation, joins, subqueries, stored procedures

Operating Systems

- Windows Family

TESTING EXPERTISE

- Manual , Automation Testing
- Functional, Regression, Smoke, Sanity, Re-Testing
- **ETL s Data Warehouse Testing**
- **Big Data Validation Testing**
- API Database Testing
- Mobile Application Testing
- GenAI-assisted Test Optimization
- Agile / Scrum Methodology

WORK EXPERIENCE

QA Engineer

ADIEL TECHNOLOGIES PVT. LTD.

Oct 2021 – Present

- 4.4+ years of experience in **Manual, Automation, API, ETL, and Big Data Testing**
- Performed **Informatica ETL validation** using source-to-target reconciliation
- Automated test scenarios using **Selenium, Playwright, Python**
- Used **GenAI tools** to improve test coverage and data validation efficiency
- Executed SQL and Hive queries for backend data validation
- Worked in **Agile/Scrum** environment

PROJECT EXPERIENCE

1. Banking Project – LOS s LMS

Client: Confidential – Private Bank

Domain: Banking / BFSI

Description:

Loan Origination and Loan Management System handling loan processing, approvals, disbursement, EMI calculation, foreclosure, and closures integrated with a data warehouse.

Responsibilities:

- Functional s Regression Testing
- ETL Testing using Informatica
- Source-to-Target validation using SQL
- API testing using Postman
- Data reconciliation and reporting validation

---

2. FinTech – Venture Capital / Investment Platform
Client: Confidential
Domain: FinTech / Investment Management
Description:
Mutual fund and investment platform supporting Equity, Debt, SIP, NAV updates (NSE/BSE), KYC, FATCA s AML.
Responsibilities:

- Automation Testing using Selenium s POM
- API Testing using Postman
- Database s ETL validation
- Regression Testing

---

3. Telecom – Big Data Analytics Platform
Client: Confidential – Telecom Provider
Domain: Telecom / Big Data
Description:
Big data platform processing customer usage, billing, and network logs.
Responsibilities:

- Big Data Testing using Hive queries
- ETL data validation
- Data quality checks
- Regression Testing

---

4. Insurance Data Warehouse Project
Client: Confidential – Insurance Company
Domain: Insurance
Description:
Centralized data warehouse for policy, premium, and claims analytics.
Responsibilities:

- ETL Testing using Informatica
- SQL-based data validation
- Defect tracking using JIRA

---

5. Healthcare – Cortex EDI Practice Management
Client: Healthcare Organization
Domain: Healthcare
Description:
Cloud-based EDI solution for claims submission, billing, eligibility checks, and claim tracking.
Responsibilities:

- Smoke, Functional s Regression Testing
- ETL testing for claims data

- SQL validation
- HP ALM s TFS defect management

---

6. Education / E-Learning Platform
Client: Confidential – EdTech Company
Domain: Education
Description:
Online learning platform for courses, exams, certifications, and payments.
Responsibilities:

- UI s Functional Testing
- Payment gateway testing
- Automation regression support

---

7. Travel s Hospitality Project
Client: Confidential
Domain: Travel s Hospitality
Description:
Flight and hotel booking system with cancellations and refunds.
Responsibilities:

- Functional s Regression Testing
- Cross-browser testing
- Payment validation

---

8. E-Commerce s Payment Gateway
Client: Confidential
Domain: E-Commerce / Payments
Description:
Online shopping platform with cart, checkout, order management, and payment processing.
Responsibilities:

- End-to-End order flow testing
- API testing for payment services
- Automation support

G. Pharma Project
Client: Confidential – Pharma Company
Domain: Pharma
Description:
Application for drug inventory, batch tracking, and compliance reporting.
Responsibilities:

- Functional s Regression Testing
- Database validation using SQL

EDUCATION
Bachelor of Engineering (B.E.)
RTMNU Nagpur University – 2019

PERSONAL DETAILS

- DOB: 01-Jan-1998

- Gender: Female
- Location: Chennai
- Languages: English, Marathi, Hindi

DECLARATION

I hereby declare that the above information is true to the best of my knowledge.
