- Chennai, Tamil Nadu

PROFILE SUMMARY

Enthusiastic and detail-oriented **Information Technology graduate** seeking an entry-level position in IT domain.Skilled in **Python, C, SQL, HTML, CSS, and React JS**, with a strong understanding of web and mobile application development. Passionate about creating efficient and scalable software solutions, with strong problem-solving skills, attention to detail, and a collaborative mindset

SKILLS AND INTERESTS

Programming Languages	Python, Java(Basics**),** C
Frontend Technologies	HTML, CSS, JavaScript, React JS
Backend Technologies	REST APIs, Microservices
Database	SQL
Tools	Microsoft office, Figma,DevOps
Core Concepts	Object-Oriented Programming (OOPs), Debugging, Agile Methodology
Soft Skills	Problem solving, Analytical Thinking, Adaptibility, Team Collaboration, Communication skills

EDUCATION

- **BTech - IT** | Sri Sai Ram Institute of Technology | **CGPA 7.16** **2025**
- **HSC** | Holy Angels Anglo Indian Higher Secondary School | **80%** **2021**
- **SSLC** | Holy Angels Anglo Indian Higher Secondary School | **79%** **2019**

INTERNSHIP

TECH MAHINDRA LTD –WEB DEVELOPMENT|JULY 2024

Developed and deployed an e-commerce website using HTML, CSS, JavaScript, and backend integration with a relational database. Designed intuitive UI/UX and implemented secure server-side logic for product, customer, and transaction management.

FABSYS TECHNOLOGIES –MOBILE APPLICATION DEVELOPMENT|JULY 2024

Built a finance management mobile app with local database storage, transaction tracking, and category-based analytics. Enhanced usability with search and visual reporting (pie charts) for efficient expense management

CERTIFICATIONS

- **Certified Associate in Project Management (CAPM)** – *Pursuing* | Project Management Institute (PMI)
- CCNAv7: Introduction to Cybersecurity | Cyber Security Essentials – CISCO | Cloud Computing – NPTEL
- Programming Essentials in Python – CISCO | Introduction to Internet of Things – NPTEL

PROJECT

AQUA AMBIENCE – WATER QUALITY MONITORING SYSTEM

- Developed an IoT-based system using ESP32 and sensors (pH, turbidity, temperature, dissolved oxygen) to monitor water quality in real time.
- Powered by solar energy with a rechargeable battery for continuous operation in remote locations.
- Implemented wireless data transmission to a web dashboard and mobile app for remote monitoring and alerts.
- Enabled eco-friendly, low-cost, and efficient water management, supporting better decision-making and productivity in aquaculture.

ACHIEVEMENTS

Hackathon & Solvethon 2.0

- Developed Aqua-Ambience, an IoT-based solar-powered system for real-time water quality monitoring.Integrated pH, turbidity, temperature, and dissolved oxygen sensors with ESP32 for accurate data collection.
- Built web dashboard and mobile app for remote monitoring and automated alerts.
- Enabled eco-friendly, low-cost water management and improved decision-making for aquaculture.
