Summary

Front-End Developer with 3+ years of experience building responsive and user-friendly web applications using Angular, React, and TypeScript. Skilled in creating scalable UI components, improving performance, and ensuring accessibility. Experienced in working with REST APIs, writing clean code, and following Agile development practices. Strong team player with a focus on delivering high-quality, easy-to-use products.

Technical Skills

- Languages: JavaScript, TypeScript, HTML5, CSS3 / SCSS
- Frameworks & Libraries: Angular, ReactJS, jQuery, Bootstrap
- Tools & Platforms: Git, GitHub, VS Code, Figma
- Performance & Optimization: Code-splitting, lazy loading, performance tuning
- Soft Skills: Communication, team collaboration, problem-solving, adaptability, leadership in feature ownership or mentoring

Professional Experience

Software Engineer
BixBytes Solutions | Mangalore, Karnataka, India | 05/2022 - Present

- Developed and optimized core features using Angular and React for CRM, recruitment platforms, high-traffic SaaS, and e-commerce applications, focusing on performance, scalability, and responsive design.
- Took ownership of features end-to-end, implemented code-splitting and lazy loading, improved load speed by 40%, and ensured accessibility (WCAG 2.1) and cross-browser compatibility.
- Collaborated with QA, backend, and UI/UX teams in Agile sprints to plan, develop, and deliver scalable features with a strong focus on performance, usability, and maintainable code.
- Mentored junior developers by helping with code reviews, debugging, and sharing best practices in Angular and React, improving team productivity and code quality.

Key Projects

Angular-Based Travel Accommodation Search App

- Technologies: Angular, TypeScript, HTML5, SCSS, Bootstrap, Mapbox, REST APIs.
- Built and maintained a live accommodation-swap platform in Angular, creating reusable components and responsive layouts with TypeScript, HTML5, SCSS, and Bootstrap.
- Integrated RESTful backend APIs with RxJS to power real-time search, booking, and user-profile features.
- Implemented Mapbox maps with custom markers and clustering to display home availability across global locations, improving user engagement and navigation.
- Fixed production issues and shipped new features in Agile sprints, collaborating with backend and QA teams to keep release cycles on schedule and maintain code quality.

React-Based CRM for Real Estate

- Technologies: React, TypeScript, Axios, Material UI, Formik, Yup, REST APIs.
- Developed a responsive and user-friendly CRM platform tailored for the real estate industry using React and TypeScript.
- Handled complex forms using Formik and Yup for validation, ensuring smooth data flow and reliable backend API integration via Axios.
- Focused on maintainable code structure, reusability, and efficient state management to improve development speed and reduce bugs.

Healthcare CRM Application

- Technologies: Angular, TypeScript, HTML5, SCSS, Angular Material, REST APIs.
- Led the development of a scalable Customer Relationship Management (CRM) platform tailored for the healthcare industry using Angular and TypeScript.
- Built reusable, responsive components with Angular Material and SCSS, improving UI consistency and user experience across devices.
- Integrated secure RESTful APIs and implemented role-based access controls to support industry-specific requirements and data privacy.
- Collaborated with QA and backend teams in Agile sprints to ensure timely delivery and maintain code quality through reviews and testing.

Recruitment Management Platform (Ongoing)

- Technologies: Angular, TypeScript, SCSS, Angular Material, RxJS, REST APIs.
- Built the project from scratch and completed the first phase of a recruitment platform using Angular and TypeScript.
- Created a clean and maintainable structure, making it easy to scale and add new features in future phases.
- Developed role-based dashboards with charts and graphs to show recruitment data clearly for different user types.
- Integrated REST APIs and used RxJS for smooth data handling and better performance.
- Working closely with QA, UI/UX, and backend teams; currently implementing video calling and upcoming features.

Education

Bachelor of Engineering (B.E.) in Electronics & Communication Engineering
Canara Engineering College, Visvesvaraya Technological University (VTU)
Mangalore, Karnataka — Graduated in 2019

Additional Experience

Previously worked as a Project Coordinator and Business Development Executive, gaining strong communication, planning, and client-handling skills that support cross-functional collaboration in development teams.
