Summary — Motivated B.Tech student with experience in Django full-stack development and Python. Skilled in building real-world projects, problem-solving, and guiding peers as a mentor. Fast learner with a strong interest in developing practical and efficient software solutions.

Skills

Programming
Python, Java, SQL
Databases
MySQL, PostgreSQL, Firebase
Design
Photoshop, Canva, Blender

Web / Backend
HTML, CSS, JavaScript, Django
Leadership
Mentoring, Team Leadership,
Soft Skills
Problem Solving, Communication, Adaptability

Tools & Platforms
Git, GitHub, XAMPP
Cloud / Mobile
Firebase, React Native

Education

Mea Engineering College
Bachelor of Technology in Computer Science and Engineering
Final Year Student
CGPA - 7.1

Certifications

- Django Full Stack Developer
- React Native App Developer
- Seven-Month Industry Experience Certificate(Worked as a part-time Web Developer)

Experience

Talrop / Steyp *Nov 2022 – present*

- Full Stack Web Developer Intern: Developed and maintained responsive web applications using modern frameworks and RESTful APIs.
- Mobile Application Developer Intern (React Native): Built cross-platform mobile apps with React Native, focusing on UI/UX and performance optimization.
- Generative AI Intern: Explored and implemented AI models for creative content generation and automation.
- Master Tutor: Mentored and led a team of junior developers, providing guidance on full-stack development and project execution

zappq : Doctor booking application Mar 2025 – Oct 2025

- Web Developer (part-Time): Maintained and optimized the company website, implemented user feedback features, and developed app redirection workflows to improve usability and engagement..

kalkus : Digital studio sep 2025 – present

- Technical Lead (Part-Time): Oversaw website development and deployment, coordinated with design and content teams to ensure brand consistency and technical excellence.

TACS MEA : Technical association for computer science department of MEA May 2025 – Present

- Student Lead: Organized technical events, workshops, and hackathons; facilitated collaboration among student developers and faculty.

IEEE MEA Student Branch Jan 2024 – present

- Web Master: Managed and updated the branch website, ensuring accessibility and timely content delivery.
- IAS Vice Chairperson: Led initiatives under the Industry Applications Society, promoting student engagement and technical skill development.

Projects

Smart Shopping Cart System integrated with RFID technology and a companion mobile application and AI-based product recommendations. *Main Project*

- Automates product detection and billing using RFID technology, eliminating manual barcode scanning and reducing checkout time..
- Integrates a mobile application to display real-time cart details, manage purchases, and synchronize data with the backend system.
- Uses AI-based product recommendation to suggest relevant items based on user behavior and purchase history, improving customer experience and sales.

College Event Management System with automated poster generation and AI-assisted features *Individual Project*

- Developed a web-based platform to manage college events, including event creation, registration, and participant management, reducing manual coordination work.
- Implemented automated poster generation using AI to create event posters dynamically based on event details, saving time and improving promotional efficiency.
- Integrated AI-assisted features such as content suggestions and smart event handling to enhance user experience and streamline event organization.

AI chatbot

- AI chatbot system that delivers company-specific information by scraping data sources and training a Large Language Model (LLM) (TALROP)

Web Development Projects

- Full-featured E-Commerce platform website with product management and online transactions
- Developed responsive and static web applications using HTML,REACT JS,NEXT JS with optimized performance and modern UI design.
- Full-featured Dynamic website contains database management,backend responsive UI etc...
