HANNA RAJ T.I.

Thiruvananthapuram,Kerala|Mail:**hannaraj06@gmail.com**|Mob: **+91 8129841253**|LinkedIn: https://www.linkedin.com/in/hanna-raj-t-i-988690298 | GitHub: https://github.com/HannaRajTI

PROFESSIONAL SUMMARY

Aspiring software developer and data analyst seeking an entry-level role to leverage expertise in Python, AI, and data analytics. Experienced in developing real-time computer vision systems and health-risk prediction applications to deliver efficient, user-focused, and impactful solutions

TECHNICAL SKILLS

- **Programming Languages:** Python, C, HTML, CSS, JavaScript, SQL.
- **AI & Machine Learning:** YOLOv8, Computer Vision, Object Detection, scikit-learn, Deep Learning.
- **Data Analytics:** Pandas, NumPy, Matplotlib, Seaborn, Data Visualization.
- **Tools & Frameworks:** OpenCV, Streamlit, Roboflow, PyTorch, MERN Stack, Pickle.

EXPERIENCE

- **Data Science & AI Intern** | AL Ric Infotech, Thiruvananthapuram (*June 2025 – Ongoing*)
  - Assisting in data preprocessing, model development, and machine learning-based analysis tasks.
- **MERN Stack Intern** | Srishti Innovative, Thiruvananthapuram (*October 2024*)
  - Gained hands-on experience in full-stack components including MongoDB, Express, React, and Node.js.
- **Python Intern** | Srishti Innovative, Thiruvananthapuram (*May 2023*)
  - Focused on Python scripting, data handling, and foundational automation tasks.

PROJECTS

Fire and Smoke Detection System

- Developed a real-time detection system using YOLOv8 object detection on custom annotated Roboflow datasets.
- Implemented live webcam detection with OpenCV, featuring bounding boxes and confidence scores for early warning.
- **Technologies: Python, YOLOv8, OpenCV, Roboflow**.

CCTV Car & Bike Detection

- Engineered an object detection system to identify vehicles in CCTV footage using a custom-trained YOLOv8 model.
- Processed a dataset of 1,023 annotated images from Roboflow to achieve high detection accuracy for traffic monitoring.
- **Technologies: Python, Ultralytics YOLO, PyTorch, OpenCV, Roboflow.**

Eagle Eye – AI Navigation System for the Visually Impaired

- Built a real-time indoor navigation aid using **YOLOv7, OpenCV, and MediaPipe**.
- Implemented object detection, face recognition, and sensor-based obstacle avoidance.
- Delivered audio and haptic feedback using Raspberry Pi for safe, hands-free navigation.

Smart Shoes – Fitness Monitoring System

- Developed an IoT-based smart shoe to track steps, calories burned, and user weight using sensor data.
- Technologies: **Arduino Nano, FSR, Accelerometer, Bluetooth, Python, IoT.**

Health Risk Prediction Web Apps (Liver & Stroke)

- Built Streamlit applications using scikit-learn to forecast health risks (Stroke/Liver disease) from patient data.
- Implemented dynamic inputs and JSON-based visualization to ensure transparency in real-time predictions.

EDUCATION

- **B.Tech in Computer Science & Engineering** | APJ Abdul Kalam Technological University (*2021–2025*) |**CGPA: 6.52/10**
- **Higher Secondary (12th)** | GHSS Neduveli (*2021*) | **81%**
- **Secondary (10th)** | GHSS Neduveli (*2019*) | **97%**

CERTIFICATIONS & AFFILIATIONS

- **Certifications:** Blockchain Workshop (2025), Ethical Hacking (2022), Startup Planning (2022).
- **Professional Events:** Attended IBM International GEN AI Conclave 2024.
- **Memberships:** Former member of IEDC, ISTE, and ICFOSS.

SOFT SKILLS & LANGUAGES

- **Soft Skills:** Problem Solving, Team Collaboration, Time Management, Adaptability, Quick Learning.
- **Languages:** English, Malayalam.
