Hiring Manager
ALTOS Technologies
Infopark, Kakkanad, Kochi,

Dear Hiring Manager,

I am writing to express my interest in the **Python Full Stack Developer** position at **ALTOS Technologies, Kochi**. As an entry-level Python developer with hands-on internship experience, I bring a strong foundation in Python, Django, and RESTful API development, along with a genuine interest in building reliable and scalable software solutions.

During my internship at **Luminar Technolab**, I gained practical experience in developing and maintaining web applications using Python, Django, HTML, CSS, and JavaScript. I worked on implementing backend functionalities, integrating REST APIs, and managing relational databases using MySQL and Django ORM. This experience strengthened my ability to write clean, well-documented code and to debug and troubleshoot issues effectively.

I have experience working in collaborative development environments, using Git for version control, participating in code reviews, and following SDLC best practices. I regularly tested application features using Postman and focused on delivering stable, production-ready code. My academic background and project work have further strengthened my analytical thinking and problem-solving abilities.

I am particularly drawn to this opportunity at ALTOS Technologies because of your focus on innovation and technology-driven solutions. I am eager to continue learning, enhance my Python development skills, and contribute meaningfully to your development team while growing under the guidance of experienced professionals.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills, enthusiasm, and commitment to learning can contribute to the success of your team.

Kind regards,

Athira Shylesh P
