EXPERIENCE

Evolve Infotech Indore
Python Developer Jan 2025 - Aug 2025

- Worked on backend development using **Python and Django** to build application features.
- Created **REST APIs** using **Django REST Framework (DRF)** for basic create, update, delete, and view operations.
- Used **SQL databases** with Django ORM to store, retrieve, and manage application data.
- Implemented **user login and role-based access** to secure backend functionality.

BestPeers - A CMMI Level 3 Company. Indore
python Developer Intern Aug 2024 - Nov 2024

Gained hands-on experience with **Python programming and OOP concepts**.
Worked with **Django models, views, and ORM** for backend development. Assisted in building backend features for web applications. Worked with **SQL/SQLite databases** for data storage and management.
Used **Git and GitHub** for version control and team collaboration.

PROJECTS

Inventory Management System (Python + Django +DRF)
Created **REST APIs** to manage products, categories, suppliers, and stock details. Used **SQL database and Django ORM** to store and update inventory records.Implemented **user login and role-based access** for admin and staff users.Implemented **JWT/session-based authentication** and basic role management.
Created and integrated a custom user model using Django's to manage user authentication.

E-Learning Platform (Python + Django)
Implemented a robust user authentication and registration system, enabling students and instructors to sign up securely. Added a feature where instructors could upload notes as PDFs, Word documents, or text files that students could download or view directly on the platform. Students were encouraged to participate in blog discussions to enhance community engagement. Integrated a commenting system on course materials, allowing students to leave feedback or ask for clarification on specific lessons.
