Java Developer | 2 Years Experience | Skilled in Java, Spring, Hibernate, MySQL

Career Objective

Seeking a position as a Java/Spring Boot Developer where I can leverage my expertise in Java, Spring Framework, Hibernate, and MySQL to build robust and scalable applications. I am committed to continuous learning and passionate about delivering clean, maintainable code in a collaborative environment.

Professional Summary

• 2 years of professional experience in Java-based application development using Java, Spring, Hibernate and MySQL.
• Proficient in developing and maintaining enterprise-level web applications using MVC architecture.
• Experience in full software development lifecycle (SDLC), including requirement analysis, coding, testing, and deployment.
• Taught Java as a faculty, staying updated with current technologies during a career break.
• Quick learner with strong analytical and problem-solving skills, now actively transitioning back into a full-time software development role.

Technical Skills

• Programming Languages: Java, C#
• Web Technologies: HTML, XML, JSP, Servlets, JavaScript
• Frameworks: Spring, Hibernate, MVC (3-tier architecture)
• Databases: MySQL, PostgreSQL
• Tools & IDEs: NetBeans, JBoss Developer Studio, iReport
• Application Servers: Apache, JBoss 7
• Concepts: OOP, JDBC, SDLC, Manual Testing

Project: Expense Tracker (Spring Boot, PostgreSQL)- Self-learning project

- Developed RESTful backend services to understand CRUD operations
- Practiced data persistence using Spring Data JPA and PostgreSQL
- Learned environment-based configuration and cloud deployment on Render
- Used Git and GitHub for version control during development

Professional Experience

Logical Soft Tech Pvt. Ltd., Indore

December 2025 – Present

- Assisted in Java-based backend development and understanding existing application flow.
- Involved in minor code changes, debugging, and issue fixing.
- Supported testing, validation checks, and documentation activities.

Java Faculty – Dr. Martheophilus School, Pune

March 2019 – June 2022

• Taught Java, OOP concepts, and basic application development using NetBeans.
• Guided students in Java mini-projects and helped debug errors.
• Reinforced understanding of backend development and quality code practices.

Assistant Java Programmer – NIC, Trivandrum

February 2014 – January 2015

• Developed backend modules for government services using Java, Spring, and Hibernate.
• Participated in manual testing, debugging, and bug-fixing cycles.
• Worked on form validation, backend processing, and report generation.

Junior Software Developer – Raimond Pvt. Ltd

July 2013 – February 2014

• Created Java-based ERP modules for export process automation.
• Used JDBC, Servlets, and JSP to manage user interfaces and backend logic.
• Helped in database design and functional testing of the modules.

Academic Qualifications

• MCA (Master of Computer Applications) with 71% from Kristu Jyoti College of Management & Technology, Changanacherry.

Project Highlights

e-District Portal – Java, JSP, Spring, Hibernate

• Developed modules for online citizen services, integrated backend with MySQL.
• Used Spring MVC for service workflows and Hibernate for ORM.
• Debugged and tested backend logic, integrated frontend forms.

Export Management System – Core Java

• Built an ERP solution for product sales and tracking in export business.
• Managed document flow, MIS reporting, and user access via Java application.

Star Street – C#

• Created a web application for models and firms to interact.
• Developed the backend database and implemented user registration modules.
