Amit Kumar Gupta

Laravel / PHP Full Stack Developer

5+ Years Experience | Laravel / PHP Full Stack Developer | SaaS | Backend Architecture | Enterprise Applications

+91 9999505469 webdeveloper.amitgupta@gmail.com https://github.com/root-775/

PROFESSIONAL SUMMARY

Senior Laravel / PHP Full Stack Developer with over 5 years of extensive experience in designing, developing, and maintaining highly scalable, secure, and business-critical web applications. Specialized in Laravel framework architecture, PHP OOP, RESTful API design, MySQL database optimization, and role-based access systems. Demonstrated expertise in building B2B SaaS platforms, complex admin dashboards, workflow-driven applications, and enterprise solutions across multiple domains including Waste Management, Healthcare, Real Estate, E-commerce, and SaaS. Strong advocate of clean code, performance optimization, and long-term system maintainability.

CORE TECHNICAL COMPETENCIES

Backend Engineering

- Laravel (Service Containers, Middleware, Policies, Jobs, Queues)
- Livewire, WireUI
- CodeIgniter
- REST API Development
- Authentication, Authorization & RBAC

Frontend Development

- Blade Templating Engine
- HTML5, CSS3
- JavaScript (ES6+)
- jQuery, AJAX
- Bootstrap, Tailwind CSS
- Ant Design (integration)

Database & Data Layer

- MySQL (Query Optimization, Indexing, Transactions)
- SQLite
- MongoDB
- Database Schema Design, Normalization
- Laravel Migrations & Seeders

Tools & Environment

- Git (Version Control)
- VS Code
- XAMPP
- FileZilla
- Linux & Windows

PROFESSIONAL EXPERIENCE

Senior Laravel / Full Stack Developer

TellyOn Media | January 2024 – Present

- Serving as a core backend engineer for a B2B SaaS platform, contributing to architecture, scalability.
- Designed and implemented complex relational database schemas supporting multi-role SaaS workflows
- Built secure admin panels and user dashboards with granular role-based access control
- Developed and maintained RESTful APIs consumed by frontend applications and internal services
- Implemented backend business logic ensuring data consistency, validation, and security
- Optimized application performance through query refactoring and backend improvements

Senior PHP Development Executive

Reliqus Consulting | November 2022 – December 2023

- Worked on enterprise-grade Laravel and PHP applications used by multiple business clients
- Refactored legacy systems to align with modern Laravel best practices
- Resolved production-critical bugs and improved system stability
- Developed new modules and customized features based on evolving business requirements
- Followed MVC architecture, clean coding standards, and reusable component design

Web Developer

BLSM Co-Operation Credit Society | September 2020 – March 2021

- Developed internal operational web systems
- Maintained backend services and frontend UI components
- Supported enhancements and long-term maintenance

Full Stack Developer

Signifier | May 2021 – October 2022

- Delivered complete Laravel applications from requirements to deployment
- Developed backend business logic, frontend UI, and database architecture
- Integrated third-party APIs and external services
- Ensured proper validation, error handling, and application security

EDUCATION

Master of Computer Application (MCA) - 74.10%
Mangalayatan University | 2022 – 2024

Post Graduate Diploma in Computer Application (PGDCA) - 69.5%
Swami Vivekanand Subharti University | 2021 – 2022

Diploma in Computer Application (DCA) - 74.0%
NIELIT, Delhi Centre | 2019 – 2020

Bachelor of Arts (B.A.)
University of Delhi (SOL) | 2016 – 2019

MAJOR PROJECT EXPERIENCE

TellyOn – B2B SaaS Platform

- Architected backend modules using Laravel and MySQL
- Developed admin and user dashboards with role-based permissions
- Implemented SaaS-specific business workflows and APIs

Aviral Ganga – Waste Management System

- Designed and implemented end-to-end backend architecture
- Developed admin dashboards, operational workflows, and reporting modules
- Managed multiple user roles and department-level data flows

Antha Jewels – E-Commerce Platform

- Built product, order, and inventory management systems
- Developed secure admin panel and customer-facing features
- Optimized backend queries and business logic

Sanraimed – Healthcare Management System

- Developed role-based healthcare administration modules
- Implemented secure handling of sensitive data
- Built backend workflows supporting medical operations

Safehouse PG – Real Estate Platform

- Developed backend systems for property listings and user management
- Implemented admin reporting and operational dashboards

Kazuki Officialstore - API

- Developed backend systems for property listings and user management
- Implemented admin reporting and operational dashboards
- Implementation third party API with credit base.

Rannkly – Online Reputation Management SaaS Platform

- Worked on a production-grade, multi-tenant SaaS platform, handling complex backend workflows
- Resolved critical backend issues, improved system stability, data accuracy, and performance
- Delivered feature enhancements and custom modules in collaboration with senior engineers

MRFurniture – Manufacturing & Enterprise Web Platform

- Enhanced backend functionality for a luxury furniture manufacturing platform
- Fixed backend issues and improved system stability
- Worked on admin-side logic and data management workflows

Maruti Vihar – Housing Society Management System

- Developed backend systems for resident management, admin workflows.
- Built secure admin dashboards for operational control
- Implemented role-based access and data validation logic
