Alishba Fatima

+923130276276 | asifalishba461@gmail.com | linkedin.com/in/alishba-asif | github.com/AlishbaAsif461 | Islamabad, Pakistan

Education

Air University, Islamabad — Islamabad, Pakistan

Bachelor of Science in Computer Science — *Expected Graduation: 2026*

Relevant Coursework: Object Oriented Programming, Data Structures and Algorithms, Database Systems, Artificial Intelligence, Data Mining and Warehousing, Mobile Computing, Software Engineering, Computer Networks, Operating Systems.

Technical Skills

Programming Languages: C++, JavaScript, Python
Technologies/Frameworks: React, Next . js, React Native, Node.js, Express.js, FastAPI, PostgreSQL, MongoDB
Developer Tools: Git, Github

Experience

AI Engineer Intern — *July 17, 2025 – August 29, 2025 | Islamabad, Pakistan Cores Connect*

- *Contributed to design and development of a modular real-time voice AI system with interruptible dialogue, leveraging AssemblyAI (STT), Groq LLM (generation), and ElevenLabs (TTS).*
- *Implemented robust task cancellation, streaming response handling, and retry logic to enhance reliability under network/API failures.*
- *Built conversation memory and error tracking workflows with MongoDB; instrumented detailed pipeline metrics to diagnose latency and improve responsiveness.*
- *Collaborated cross-functionally to refine UX for voice selection and session management, enabling faster iteration and better user experience.*

Projects

ContentForge | MERN, OpenAI — March 2025 – Present

- Built a **full-stack web app** using MERN that repurposes long-form content into platform-specific social media posts using **OpenAI LLM**.
- Implemented **JWT and OAuth authentication** with Passport.js for secure user access.
- Integrated **Stripe** for subscription management and real-time payment analytics.
- Used **Tanstack Router & Tanstack Query** for routing and efficient data caching.

Mental Health Diagnosis Application | Python, FastAPI, OpenAI LLM, React — April 2025 – Present

- Developed a **diagnostic app** enabling real-time conversations with **OpenAI LLM** to classify mental health disorders.
- Integrated a **custom-trained neural network** for accurate inference based on extracted conversation parameters.
- Built a **FastAPI backend** and **React frontend** for a responsive and interactive UI.
- Implemented **real-time conversation flow** with dynamic extraction of key parameters for prediction.

Plantsnap | Flutter, Firebase, API — April 2024 – June 2024

- Created a **cross-platform mobile app** using Flutter for plant identification via recognition API.
- Integrated **Firebase authentication** and cloud storage for secure data handling.
- Developed **plant-saving and user profile features** for personalized experiences.
- Optimized app performance for handling large-scale plant data efficiently.

Real-Time Voice Agent | *Python, PyAudio, AssemblyAI, Groq LLM, ElevenLabs, MongoDB, Redis*
Aug 2025 – Present

- *Built a low-latency voice agent with streaming STT (AssemblyAI), Groq LLM for rapid responses, and Built a real- time voice agent supporting natural, interruptible conversations with low latency.*
- *Implemented streaming STT (AssemblyAI), Groq LLM for rapid responses, and ElevenLabs TTS with audio caching.*
- *Designed a modular, threaded architecture with concurrency handling and TaskManager for prioritization.*
- *Persisted conversation memory, profiling metrics, and error logs in MongoDB, with Redis caching for faster retrieval.*

JobBoard Mini | *Next.js, TypeScript, Prisma, PostgreSQL* — *1 Sep 2025 – 26 Sep 2025*

- *Developed a full-stack job marketplace with role-based dashboards for Admins, Employers, and Applicants.*
- *Implemented secure user authentication (NextAuth), resume uploads via Cloudinary, and end-to-end job/application workflows.*
- *Built reusable UI components with responsive design and deployed production-ready app on Vercel.*
