PROFILE SUMMARY

Junior Software Developer with 1+ year of experience building responsive web applications using Python and Django. Skilled in developing RESTful APIs, database schema design, and front-end development with JavaScript, CSS, and Bootstrap.Strong problem-solving abilities and attention to detail with a commitment to delivering quality solutions.

WORK EXPERIENCE

SUGI INFOTECH – Full-time Madurai, Tamil Nadu, India **July 2024 - June 2025**

- Developed and maintained IsoTracker quality management platform serving 130+ companies using Python and Django, translating user and business requirements into functional products for document control, audits, and complaint handling
- Built RESTful APIs with Django REST Framework and designed database schemas in MySQL, achieving 20% improvement in query performance through optimization.
- Implemented responsive front-end interfaces using HTML5, CSS3, Bootstrap and jQuery; integrated AJAX for dynamic updates, reducing page load times by 40%
- Performed debugging, maintained version control using Git and GitHub, and conducted code reviews and unit testing to ensure code quality.
- Utilized npm, yarn, and webpack for dependency management and build optimization while following Django MVT architecture and OOP principles

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, HTML5, CSS3, SQL
- Frameworks & Libraries: Django, Bootstrap, jQuery,Reactjs
- AI/ML: Gen-AI APIs, RAG (Retrieval-Augmented Generation)
- Databases: MySQL, SQL Server, Database Schema Design & Modeling
- Web Development: Responsive Design, DOM Manipulation, AJAX, JSON, RESTful APIs
- Tools & Technologies: Git, GitHub, npm, yarn, webpack, VS Code
- Architecture & Practices: OOP, MVT Architecture, Debugging, Unit Testing, Agile

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering
Sethu Institute of Technology, Madurai
CGPA: 7.8
2020-2024

PROJECTS

- **Event Booking Management System** – Full-stack web app built with React and Django featuring user authentication, event management, and QR-based ticket validation.
- **Hot Food – Food Delivery Website** – Developed using Django and Bootstrap with modules for order management, cart system, and secure authentication.

Certifications & Awards: Web App Development (Coursera), Digital Marketing & E-commerce (Coursera), Runner-Up at FLAIR-2K22 (SVM Project)
