SREEHARI SREENIVASAN

Python-Django Developer

Kottayam | 8921027605 | sreeharisreenivasan30@gmail.com | Linkedin

Professional Summary

Python / Django Developer with hands-on experience designing and developing full-stack web applications using Django, MySQL, HTML, CSS, and JavaScript. Independently built and owned real-world projects including a car rental system and blog platform featuring authentication, CRUD operations, and database-driven workflows. Strong foundation in backend development, DBMS concepts, and responsive web design.

Training & Hands-on Experience

Python Web Development (Django) – IPSR Solutions

- Strengthened core Python programming and OOP concepts
- Created production-style Django applications
- Worked with MySQL database integration
- Implemented authentication and backend logic
- Hands-on project development completed as part of Python Web Development (Django) training.

Technical Skills

- Programming : Python (core syntax, OOP concepts, exception handling), JavaScript (basic DOM manipulation)
- Backend Development : Django framework, Django ORM, MVT architecture, user authentication, authorization, and backend business logic implementation
- Database : MySQL, relational database design, normalization, writing queries, integrating databases with Django applications
- Frontend Technologies : HTML, CSS, responsive web design,
- Tools: Git, VS Code,PyCharm
- Concepts: CRUD Operations, Authentication, MVC Architecture

Education

Bachelor of Computer Applications (BCA)
Mar Augusthinose College, Ramapuram | 2021 – 2024

Projects

Car Rental Web Application | Django, MySQL, HTML, CSS, JavaScript

- Developed a full-stack car rental platform with user authentication and booking functionality
- Implemented CRUD operations for vehicle listings and reservations
- Designed MySQL schema with 5+ relational tables to manage users, vehicles, and reservations
- Ensured secure user access through Django authentication and role-based permissions
- Improved usability with responsive frontend design using HTML,CSS

Blog Management System | Django, MySQL

- Independently Built a dynamic blog platform supporting user registration, login, and role-based access
- Constructed and led post creation, editing, and deletion using Django ORM
- Build CRUD functionality for blog posts using Django ORM
- Designed clean, responsive UI to enhance readability and user experience
