MUHAMMED SANEEB E K

AI Developer

saneebsans@gmail.com +91 9744968051 Malappuram, Kerala saneeb saneeb7de

Profile

Bold and fast-moving AI Developer with hands-on experience building production-grade voice agents, RAG systems, automations, and AI-integrated applications. Skilled in Python, FastAPI, OpenSearch, Generative AI, and agentic workflows. Known for developing high-impact solutions quickly and deploying them reliably on cloud environments.

Experience

AI Developer Intern, *Lifosys Digital Systems Pvt. Ltd.* 04/2025 – 12/2025
Kozhikode, Kerala

Education

B.Sc. Multimedia and Web Technology, *Nilgiri College of Arts and Science, Thaloor* 2022 – 2025
Bharathiar University The Nilgiris

Diploma in AI and Robotics, *Nilgiri College of Arts and Science, Thaloor*
Lincoln University

Skills

Frontend
React, Flutter, Streamlit.

Backend
Python, FastAPI, Django, PostgreSQL.

Tools
MCP, n8n, Firebase, REST APIs.

AI/ML
LLMs, RAG Systems, Voice Agents, Vector Databases, OpenSearch.

Cloud & DevOps
AWS, GCP, Firebase, Render, Netlify, Play Console.

Projects

Shared Locker
Built a FHIR-compliant medical vault using Flutter and FastAPI, featuring OpenSearch and AI context handling. Securely deployed on AWS with Nginx.

VoiceMed
Automated clinical documentation using speaker diarization to extract medical entities and generate structured, actionable summaries.

AI Campus Chatbot
A conversational interface designed to handle both internal and external college-related inquiries, providing instant and accurate information.

AI Voice Hospital Assistant
A voice-activated system for managing hospital logistics, including appointment booking, cancellations, and retrieving information efficiently.

AI-Integrated Robotic Head
An Arduino-powered robotic head that mimics user head movements, performs real-time emotion detection, and responds with corresponding LED indicators.

LMS
A Django-based LMS platform featuring role-based access control and secure Razorpay integration for monetized course delivery.

Agentic RAG Chatbot
Developed a multi-format document question-answering chatbot using the Model Context Protocol (MCP) for advanced retrieval and contextual understanding.
